DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10 are drawn to a method for inducing an immune response against transformed, infected or diseased tissue, classified in class 514, subclass 12.
- II. Claims 11-16 are drawn to a composition for inducing an immune response against transformed, infected or diseased tissue, classified in class 530, subclass 350.

The invention are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of use and product. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product can be used other than in a method for inducing an immune response against transformed, infected or diseased tissue, such as it can be used to produce antibodies to detect the various cytokine molecules. In addition, since the process does not recite the use of a particular product, it can be practiced with another materially different product.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

2. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement to be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jegatheesan Seharaseyon whose telephone number is 703-305-1112. The examiner can normally be reached on M-F: 8:30-4:30.
